

Can PCI-listed P2PE v2.0 applications be used in PCI P2PE v3 solutions/components?

PCI SSC FAQ | Article 1367 | April 2020

Yes. P2PE applications currently listed as a valid PCI P2PE v2.0 application can be used in a PCI P2PE v3 solution or component and must be included as part of the overall solution assessment. The P2PE v2.0 application's listing will retain its existing properties and will still be governed by version 2 of the PCI P2PE Program Guide, including the P2PE application's associated reassessment date .
